SUMMARY

Recent computer science graduate with hands-on experience in programming languages such as Python, HTML&CSS, JavaScript and frameworks like bootstrap and ReactJs. Developed several projects during academic coursework and internships, demonstrating strong problem-solving abilities and a passion for coding. Looking to start my career in a tech-savvy environment where I can grow my skills and contribute to innovative software solutions.

TECHNICAL SKILLS

- HTML&CSS
- JavaScript
- Bootstrap
- React Js
- Python
- SQL
- UI UX Designing

SOFTWARES

- Visual studio code
- Ms office
- Figma
- Photoshop

STRENGTHS

- Communication
- Adeptability
- Decision-Making
- Teamwork

INTERNSHIP

Data Annotator, Adept Talent Acquisition

March 2024 - May 2024

- Analyzing raw data and applying appropriate annotations.
- Ensuring accuracy and consistency in the labeling process.
- Collaborating with data science teams to improve dataset quality.
- Using specialized tools for annotation, such as bounding boxes, segmentation, or metadata tagging.

EDUCATION

Bachelor of Computer Applications (BCA)

Oct 2021 - May 2024

kakraparti Bhavanarayana College vijayawada
CGPA : 7.89

Intermediate - MPC

June 2019 - May 2021

Sri Chaitanya Junior College , Vijayawada
Marks - 749

Secondary School Education

june 2018 - March 2019

Vivekananda High School, Vijayawada
GPA : 8.5

PROJECTS

1. Grocery Store Application (Built using Python and Flask)

- Developed a web application that allows store owners to save customer details and track purchase history.
- Designed and developed a database to store customer data, including names, contact information, and purchase history.
- Integrated features for adding, updating, and deleting product information in the store.
- Used Flask to create a seamless user interface and connect the front-end with the back-end functionality.

2. Registration Application (Built using React.js and Firebase)

- Developed an online registration application that collects and stores user information securely.
- Utilized React.js for building a dynamic and responsive user interface.
- Integrated Firebase to handle user authentication and real-time data storage.
- Implemented form validation to ensure the accuracy of user input before submission.
- Enabled users to register and manage their profiles through a simple, user-friendly interface.
- Ensured data security and privacy by using Firebase's built-in features for authentication and data storage.
